

Why you need mattress protection

We return each night to a luxurious mattress on which we sleep for 8 to 9 undisturbed hours, and never think about the condition of our mattress if it doesn't feel like it needs to be replaced.

Yet, we all perspire when we are sleeping and an unprotected mattress will absorb this perspiration along with other bodily fluids from incontinence or even accidental spills.

As your mattress is rarely if ever cleaned, it is no surprise that your new mattress is the perfect breeding ground for bacteria, mold spore, dust mites, and other allergen particles.

Allergens and bacteria can take a serious toll on your health and there is a direct link between ailments such as Asthma, Rhinitis and eczema and the presence of dust mites.

When you protect your mattress you also protect your health.

An unprotected mattress will expose you to the following symptoms:

- Difficulty breathing
- Itchy eyes
- Sore Throat
- Itchy skin
- Asthma, watery eyes
- Sinus problems
- Hoarseness
- Rashes and hives

Over 750,000,000 million people suffer from dust mite allergies

Patented Technology

MICRONONE[®]
Hypoallergenic Fabric

MicronOne allergen barrier fabric is known to allergen sufferers as the go-to choice to alleviate night-time allergic reactions from allergens stuck in a mattress.

The pore size of MicronOne fabric is only 1 micron small. For example, dust mite fecal matter is 10 microns, and pet dander is 2.5 microns. Sleep well knowing allergens cannot infest your mattress, and those already in the mattress cannot effect you while you sleep.

The Zip-N-Click™ Zipper Enclosure

The Zip-N-Click bed bug blocking zipper enclosure provides complete protection against bed bugs by securing the most vulnerable point of the encasement against infestation, the zipper clasp, by snapping shut and forming an impenetrable seal to even the smallest bed bug nymphs.

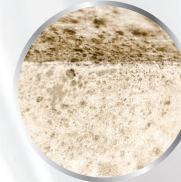

Waterproofing with Breathability

CleanRest waterproof mattress protectors and encasements are both impermeable and breathable at the same time. Breathability is tough to maintain with waterproof products, but CleanRest has developed a thoughtful venting system to allow air to escape the mattress to avoid the creation of a hot bed.

Blocks Allergens

Blocks Mold Spore

Blocks Bed Bugs

Blocks Spills
